

THE WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

Tel: (618) 205 5007 Fax: (866) 707 2632 Email: sales@bofaamericas.com Web: www.bofaamericas.com

BOFA is the multi award-winning global market leader in fume extraction systems, acknowledged as number one in the industry, with an unrivaled heritage of nearly 30 years. BOFA Americas, Inc provides expertise that is trusted by

all sizes of businesses from global market leaders to niche production lines in a wide cross section of industries and for all types of demanding applications. Take a look at our range highlights and give us a call.

LASER FUME EXTRACTION SYSTEMS

Advantage

AD Access AD 350 AD Nano AD Oracle SA iQ AD Oracle iQ AD PVC iQ AD 500/1000/1500 iQ AD 2000 iQ

BOFA's range of ADVANTAGE laser fume extraction and filtration systems are designed for applications that generate particulate and gaseous volatile organic compounds (VOC's) within the

Laser Marking, Coding, Cutting and Engraving Industries. Our comprehensive understanding of these processes and applications reflects our manufacturing technology and product designs.

BASE EXTRACTION SYSTEMS

BOFA's Base range of fume extraction systems are purpose built for laser engravers to sit directly on top, incorporating BOFA's filter technology and optional on-board compressor.

AD Base 1 Oracle AD Base 2 Oracle AD Base 3 AD Base C180 AD Base Z

IN-LINE FILTERS

Inline Filter

Extends filter life for use on applications that create large amounts of particulate and dust.

Volume

V200 V250 V Oracle SA iQ V Oracle iQ V 500/1000/1500 iQ

BOFA's range of Tip and Volume solder fume extraction systems are designed for applications that generate fume including resin acid particulate and gaseous organic compounds within the

electronics sector. Fume extraction solutions are available for manual and automated processes including: wave solder, reflow, selective solder and conformal coating solder applications.

CABINET FUME EXTRACTION

FumeCAB

Fume cabinet and partial enclosure extraction systems are purposely designed to extract fume and hazardous substances from a variety of applications and industries.

BEAUTY FUME EXTRACTION

Pure Beauty

BOFA's PureBEAUTY fume extraction units effectively remove potentially harmful particulates and odors generated from hair and beauty treatments and a variety of other applications, including: nail treatments, laser hair removal, perming, bleaching, coloring and straightening.

DUST EXTRACTION

DustPRO

BOFA's range of DustPRO dust collectors and fume extraction systems have been designed for the safe and effective removal of particulate, dust and swarf generated during processes such as drilling, routing, mechanical engraving, and grinding.

MOBILE EXTRACTION

Mobile

The multi-purpose FumeKART is the ideal movable/portable air extraction and filtration unit for a wide variety of applications, industries and processes.

PRINTING FUME EXTRACTION

PrintPRO

BOFA's range of PrintPRO fume extraction systems are designed for applications that generate particulate and gaseous organic compounds within the wide and super-wide format printing sector. Solutions are available for a variety of ink types including; Solvent, UV and Dye Sublimation.

DENTAL DUST EXTRACTION

DentalPRO

BOFA's DentalPRO range of dust and fume extraction systems and accessories effectively removes potentially harmful Zirconia dust and particulate generated during the CAD/CAM manufacture of Crown and Bridge frameworks for dental implants.

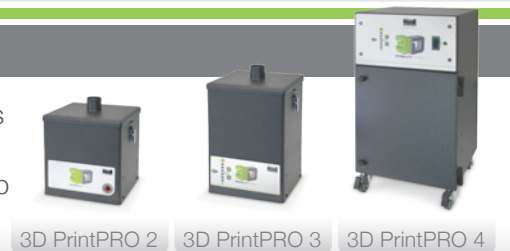

3D PRINTING FUME EXTRACTION

3D Printing

BOFA's range of 3D printing fume extraction systems are designed for all types of 3D printing applications including those that generate nano particulate and gaseous organic compounds. Solutions are available for open framed, tabletop and large enclosed 3D printers.
